

C/S Tetras™ Clean-off Carpet Tiles Maintenance Instructions

Pedisystems

Daily Maintenance

Vacuum daily with a powerful suction machine fitted with rotating head brushes. The brushes will agitate the pile, loosening the soiling which is then removed by the suction action.

Chewing gum

Freeze the gum with a freezer spray, shatter the gum with a hammer and agitate with a scraper, then vacuum up the fragments. This should be done on a daily basis; chewing gum left longer may require more than one treatment.

Periodic Maintenance

In high traffic areas the matting should be deep cleaned four to six times a year with more of the cleans undertaken in the winter months. Deep cleaning can be carried out using a water spray extraction method whereby water is sprayed into the carpet pile, agitated and then extracted along with the soil, or by a dry cleaning method whereby a dry cleaning compound is brushed into the pile where it binds to the soil and is vacuumed out.

Water temperatures should not exceed 60°C.

Detergents should be used sparingly.

Only use chemicals suitable for cleaning carpets.

Strictly follow manufacturer's instructions.

Deep Clean Specification.

- 1) Cylinder power brush.
- 2) Dry suction clean.
- 3) Pre-spot treatment.
- 4) Hot water extraction with detergent.
- 5) Hot water rinse.
- 6) Post-spot treatment.
- 7) Post dry groom.

Damage

In the event of any damage occurring please contact the manufacturer, most problems can be overcome on site without the need to return the mat to the factory.

Stain Removal

Category One

Caramel	Jam
Soft Drinks	Ketchup
Fruit Juice	Liquors
Gravy	Cocoa
Honey	Salad Dressing

Use PROCHEM* Neutral Spot Remover.

Category Two

Berries	Grass Stains
Blood	Ice Cream
Coffee	Pet Food
